

Tips For Preparing Your Entry

Night Before the show

- Select your fully developed bloom/specimen.
- Cut the stem in a room temperature environment.
- Place the plant in the water.
- Trim the stem while it is in the water.
- Leave the specimen in the water overnight.
- Daylilies can be trimmed a day before the show for the best stability.

Morning of the show

- Remove any old blooms and damaged leaves.
- Trim the stem so that your display container is 2/3 of the height of the specimen
- Place the specimen the permitted container with fresh water that covers the end of the stem.
- Do not cut the anthers of the Lilies.
